NOKUTENDA ANNA CHIMWAMUROMBE — Portfolio Website

A personal portfolio website for Nokutenda Anna Chimwamurombe, Senior Web Engineer.

📂 Project Structure

```
portfolio/
├── index.html          # Home page
├── about.html          # About page (bio, skills, education, experience)
├── projects.html       # Projects showcase
├── contact.html        # Contact form
├── c.css               # Styles for index.html
├── cc.css              # Styles for about.html
├── ccc.css             # Styles for contact.html
├── cv.css              # Styles for projects.html
├── navbar.css          # Shared navbar styles (used on all pages)
├── javascript.js       # Shared JavaScript (mobile navbar toggle)
├── edfg.jpg            # Profile photo
├── p1.PNG              # Project 1 screenshot
├── p2.PNG              # Project 2 screenshot
├── p3.PNG              # Project 3 screenshot
└── wallpaperflare.com_wallpaper.jpg  # Background image
```

🛠 Technologies Used

Technology	Purpose
HTML5	Page structure and content markup
CSS3	Styling, layout (Flexbox, Grid), animations, and responsive design
JavaScript (Vanilla)	Mobile navigation toggle interactivity

> No external libraries or frameworks are used — this is a pure HTML/CSS/JS project.

📄 Pages

🏠 `index.html` — Home

The landing page. Displays the hero section with a profile photo and a **Call to Action** button linking to the Contact page.

👤 `about.html` — About

Contains:

- Profile photo and name
- **About Me** section
- **Skills** (HTML/CSS, C#, JavaScript)
- **Education** timeline (Computer Science, University of Zimbabwe, 2022–2024)
- **Experience** timeline (Web Designing at Klenifin, 2025–2026)
- Link to Contact page

📁 `projects.html` — Projects

A grid of three project cards, each with:

- A screenshot image
- Project title and description
- A GitHub link (placeholder — update with real URLs)

📬 `contact.html` — Contact

A contact form with fields for:

- Full Name
- Email Address
- Subject
- Message

The form submits via `mailto:` to `nchimwamurombe@gmail.com`.

🚀 How to Run

This is a **static website** — no server or installation required.

1. **Download or clone** all files into a single folder.
2. Make sure all files (HTML, CSS, JS, and images) are in the **same directory**.
3. Open `index.html` in any modern web browser (Chrome, Firefox, Edge, Safari).

```bash
# If you have VS Code, you can also use Live Server:
# Right-click index.html → "Open with Live Server"
```

📱 Responsive Design

The navbar is fully responsive:

- On screens wider than **880px**: links display horizontally in the top bar.
- On screens **880px and below**: a hamburger menu (☰) appears. Clicking it slides in a full-height side menu.
- On screens **460px and below**: font sizes are adjusted for small mobile screens.

✏️ Customisation Guide

What to update	Where
Your name / title	`index.html`, `about.html`
Profile photo	Replace `edfg.jpg` with your image (keep the same filename or update `src`)
About Me bio text	`about.html` — the empty `<p>` under `<h2>ABOUT ME</h2>`
Skills	`about.html` — add/edit `.skills` `<div>` blocks
Education & Experience	`about.html` — edit `.timeline` blocks
Projects	`projects.html` — update `<h4>`, `<p>`, and `<a href>` for each project card
GitHub links	`projects.html` — replace `https://github.com/yourprofile` with your real URLs
Contact email	`contact.html` — update `action="mailto:..."` in the `<form>` tag

What to update	Where
Background image	Replace `wallpaperflare.com_wallpaper.jpg` and update the filename in each CSS file

---

⚠️ Known Issues / Notes

- The `mailto:` form on the Contact page opens the user's local email client. For a proper backend form submission, consider integrating a service like Formspree or EmailJS.
- The intro `<h1>` and `<p>` inside `.intro` on `index.html` are currently empty — add your tagline or description there.
- The GitHub links in `about.html` and `projects.html` currently point to `https://github.com/yourprofile` — update these with real links.
